Introduction

For a long time, I was hesitant to write about legends simply because this subject was tackled and discussed from so many authors. However the desire of drafting my own thoughts and to write about this subject from my own point of view was strong and hard to impede.

Each of us might have a good idea of what it means to be a legend but when it comes to defining the concept, the picture is not so clear for some.

Legends harbor huge components of skills, personal traits and real efforts linked with other external components that are involved to shape the full picture of a leader. If we look around and carefully view the bio of well-known leaders in different fields weather in trade, economics, science ,social or political , we will witness and discover great similarities among them in all aspects weather in personality traits ,skills etc.

This book will give a strong highlight on what a legend is and what skills, personality traits that has to be available and exist, then moving on to highlight on the different style, types of legends with their impact and how they shaped the minds and souls of entire generations.

Finally, a clear highlight on selected leaders in different fields that has strongly influenced and shaped our lives.

I sincerely hope I have handled this important subject from a wider angle that can be useful and enjoyable to my dear readers.

Enjoy reading

The Role of Legends

The Role of Legends

Since the beginning of human settlement, a lot of people came up with ideas, philosophies, beliefs, experiments, research, redesigning of thoughts, talents and surveys to bring myths to reality.

People contributed in various life aspects science, politics, littered, arts, social activities and so many

other fields. These genius minds put a keen interest on every phenomenon right from when they were young. The zeal, passion, dedication, hard work and efforts they put into their work helped them discover something new about the world we live in.

Due to these efforts and unique talent the world today dwells in the abode of their achievements in different sectors. The present picture of the world that we see would not have transformed without the contribution of these great personalities. Great philosophers and masterminds that existed from the ancient Greek era to the present day

In these Legends, we've seen inexplicable abilities that helped us define our existence and human life. Human Rights

HUMAN RIGHTS

As we believe the sanctity of human life has ancient precedents in many religions of the world, the idea of modern human rights began during the era of renaissance humanism in the early modern period.

The European wars of religion and the civil wars of seventeenth-century England gave rise to the philosophy of liberalism and belief in human rights became a focal concern of European intellectual culture during the eighteenth-century Age of Enlightenment.

These ideas of human rights were at the core of the American and French Revolutions which occurred toward the end of that century. Democratic evolution through the nineteenth century paved the way for the advent of universal suffrage in the twentieth century. Two world wars led to the creation of the Universal Declaration of Human Rights.

The post-war era witnessed human rights movements for special interest groups such as feminism and the civil rights of African-Americans. The human rights of members of the Soviet bloc emerged in the 1970s along with workers' rights in the West.

The movement quickly came together as social activism and political rhetoric in many nations put it high on the world agenda. By the 21st century, Moyn has argued, the human rights movement expanded beyond its original anti-totalitarianism to include numerous causes involving humanitarianism and social and economic development in the Developing World.

Some concepts of righteousness present in ancient law and religion is sometimes retrospectively

included under the term "human rights". While Enlightenment philosophers suggest a secular social contract between the rulers and the ruled, ancient traditions derived similar conclusions from notions of divine law, and, in Hellenistic philosophy, natural law.
